Takeaways

The percentages of clients credit scores are consistent across both groups, indicating there is little connection between credit score and a client leaving the bank.

The distribution of customers from Spain is consistent across both groups. France holds the largest percentage of clients whether they left the bank or not (over 50% of all current clients are from France). Germany has a larger percentage of clients who have left the bank (nearly 40%).

A higher percentage of current clients are male. In regards to clients who have left the bank, nearly 60% are female. **This may be a contributing factor.**

The vast majority (78%) of current clients are between the ages of 26 and 45. Of the clients who have left the bank, the majority ages are between 36 and 55 (a slightly older demographic). **This may be a contributing factor.**

While there is some variability, the percentages of clients for each tenure remains consistent across both groups, indicating that that tenure is likely not a risk factor for a client to leave the bank.

43% of clients who have left the bank had account balances between \$100,000 to \$140,000. The same balance range holds the majority of clients who are still with the bank, however to a lesser extent. **This could be contributing factor.**

Any client who had 4 products has left the bank. There are no current clients with 4 products. The vast majority of clients who left the bank had 1 product, followed by a relatively even split between 2 and 3 products. In contrast, current clients are relatively evenly split between 1-2 products. **This is likely a contributing factor.**

The percentages of clients credit scores are consistent across both groups, indicating having a credit card is not a risk factor for a client to leave the bank.

For current members, there is a relatively even split between being an active member or not. However, in regards to clients that have left the bank, 70% are not active, whereas 30% are active. **This indicates that being an active member is likely a large contributor.**

While there is some variability, the percentages of clients for each estimated salary range remains consistent across both groups, indicating that that salary is likely not a risk factor for a client to leave the bank.

Summary Statistics:

	Current Clients				Minimum
